

# PET Washing System

PET bottle recycling is an economic opportunity to better the environment and be profitable, even when the raw material prices are low.

With more than 10 years of experience in PET recycling worldwide, we provide a solution that meets your needs in value and efficiency.

From the experience gained in manufacturing a large number of recycling lines in various countries and obtaining detailed user feedbacks for all kinds of PET bottles recycling, HPS and GET continually improved our PET recycling solutions, ensuring our customers; output capacity, flakes quality and low operation costs.

The flakes produced are suitable for the following applications:

Bottle to Packaging

Bottle to Fibers

Bottle to Sheet

Bottle to Strapping

Standard output: 1000, 2000, 3000, 4000,5000 kg/h

## Features:

Tough stainless steel (SUS304) construction

SKF bearing with long service time

Labyrinth sealing prevents plastic powder or water enter into bearing

Foot shocks for shock absorption

Security pins and security bolts protect the human bodies and equipments efficiently .

Wear resistant material paddles with more than 7500T service time .

Quick fixing screen design saves maintenance time .
